- affine coordinate ring, 20
- affine morphism, 172
- affine  $n$ -space, 31
- affine scheme, 108
- affine variety, 30
- algebraic set, 8, 12
- associated point of coherent  $\mathcal{O}_X$ -module, 207
  
- bijective morphism, 31
- birational correspondence, 128
- birational morphism of varieties, 73
- blowing-up [affine space version], 220
- blowing-up [scheme version], 224
- branch locus of a finite morphism, 303
  
- Chevalley, 72
- Chow's lemma, 85
- closed immersion, 146
- closed subscheme, 145
- coherent  $\mathcal{O}_X$ -module, 206
- complete non-singular model of a curve, 284
- complete variety, 77
- complex variety, 80
- component of an algebraic set, 11
- conic, 16
- conjugation map, 131
- connectedness theorem of Zariski, 183
- constructible subset of a variety, 71
- cotangent bundle, 236
- cotangent space, 235
  
- dimension of a variety, 56
- dimension [topological characterization], 61
- dimension (upper semi-continuity of —), 72
- discrete valuation ring, 102
- dominating morphism of varieties, 67
  
- elimination theory, 76
- embedded component of a scheme, 208
- embedding dimension, 236
- equality of two morphisms at a point, 163
- étale morphism, 243
- exceptional divisor, 221
- exceptional subscheme, 224
  
- factorial variety, 259, 289
- fibre of a morphism, 153
- fibre product, 116
- field of definition, 131
- finite morphism, 172
- finite morphism of affine varieties, 57
- finite type (morphism of —), 168
- finite type (prescheme of — over  $R$ ), 122
- flat morphism, 297
- flat ( $\mathcal{O}_X$ -module — over  $\mathcal{O}_Y$ ), 297
- flat  $R$ -module, 295
- function field of a prevariety, 37
- functor of points, 155
  
- generic point [affine version], 94
- generic point [prescheme version], 114
- generic stalk, 29
- geometric fibre of a morphism, 155
- geometric point of a prescheme over  $k_0$ , 162
- global section of a presheaf, 27
- going-down theorem of Cohen-Seidenberg, 179
- going-up theorem of Cohen-Seidenberg, 4
- Grothendieck, 212
- Grothendieck's existence problem, 160
  
- Hensel's lemma, 247
- Hilbert's Nullstellensatz, 8
- Hironaka, 186
- homological method, 192
- homomorphism of  $\mathcal{O}_X$ -modules, 193
  
- invertible  $\mathcal{O}_X$ -module, 208
- irreducible algebraic set, 10
- irreducible topological space, 36
  
- Krull dimension of a local ring, 63
- $k_0$ -topology, 136
- $K$ -valued point of a prescheme over  $S$ , 158
  
- local criterion for varieties, 55
- local criterion for variety [proof], 165
- locally free  $\mathcal{O}_X$ -module, 208
  
- map of presheaves, 24
- maximal atlas, 209
- morphism of irreducible algebraic sets, 18
- morphism of preschemes, 108
- morphism of prevarieties, 41
  
- Nagata, 271
- Nakayama's lemma, 79, 212
- noetherian decomposition theorem, 10
- noetherian scheme, 205
- noetherian topological space, 22
- Noether's normalization lemma, 3, 176
- Noether's normalization lemma (geometric form of —), 59
- Noether's normalization lemma over  $R$ , 180
- non-singular closed point, 232
- non-singular in codimension one, 273
- non-singular point (not necessarily closed), 236
- non-singular variety, 236
- normal point of a variety, 272
- normal variety, 272
- normalization of variety, 277
- Nullstellensatz (Hilbert's —), 8
- Nullstellensatz (weak —), 6
  
- order  $\text{ord}_Z(f)$  of vanishing of  $f$  along  $Z$ , 273
  
- power series methods, 192
- prescheme, 108

prescheme of finite type over  $R$ , 122  
 prescheme over  $R$ , 116  
 presheaf, 24  
 prevariety, 123  
 prevariety [definition], 35  
 prevariety over  $k_0$ , 143  
 principal ideal theorem (Krull's —), 57  
 principal valuation ring, 102, 198, 214  
 product of two prevarieties, 47  
 projective methods, 192  
 projective variety, 40  
 projectivized tangent cone, 225  
 proper morphism, 168  
 pure codimension, 61  
 pure dimension, 61

quasi-coherent  $\mathcal{O}_X$ -ideal, 150  
 quasi-coherent  $\mathcal{O}_X$ -module, 195

ramification point of a finite morphism, 303  
 rational closed point over  $k_0$ , 136  
 rational function on a prevariety, 37  
 reduced prescheme, 123  
 relative differential [definition], 203  
 relative differential (sheaf  $\Omega_{X/Y}$  of —s), 199  
 $R$ -morphism, 116

scheme, 164  
 section of a presheaf, 27  
 separable, 142, 143, 201, 202, 245, 246, 256  
 separably algebraic closed, 142, 143  
 separating transcendence basis, 201  
 sheaf, 25  
 sheafification of a presheaf, 26  
 smooth morphism, 304  
 space curve, 66  
 specialization of a closed subset of  $\mathbb{P}^n(k)$ , 182  
 specialization of  $x \in \mathbb{P}^n(k)$ , 177  
 $\text{Spec}(R)$ , 93  
 stalk, 26  
 strong topology, 81  
 structure sheaf of an affine scheme, 100  
 structure sheaf of an irreducible algebraic set, 28  
 structure theorem of integrally closed noetherian rings, 272

tangent cone, 215  
 tangent cone [final definition], 216  
 tangent cone [provisional definition], 215  
 tangent space [final definition], 231  
 tangent space [provisional definition], 228  
 torsion part, 199  
 trivialization, 212  
 twisted cubic, 14

UFD property at non-singular points, 259  
 UFD property at singular points, 269  
 uniformizing parameters [definition], 256  
 uniformizing parameters [motivation], 255  
 universally torsion-free, 297  
 upper semi-continuity of dimension, 72

valuative criterion for completeness, 80  
 valuative criterion for properness, 171  
 variety, 52, 164  
 vector bundle with atlas, 209

Zariski topology of a projective algebraic set, 23  
 Zariski topology of an affine algebraic set, 21  
 Zariski topology of an affine scheme, 93  
 Zariski's main theorem [connectedness form], 289  
 Zariski's main theorem [Grothendieck's form], 289  
 Zariski's main theorem [motivation], 286  
 Zariski's main theorem [original form], 288  
 Zariski's main theorem [power series form], 289  
 Zariski's main theorem [topological form], 288  
 zeroth cohomology of a presheaf, 27
