## TITLE

FIRST AUTHOR* AND SECOND AUTHOR<br>Dedicated to Professor Xxx Yyy on his sixtieth birthday

AbStract. Mathematical symbols and formulas should not be used in the abstract.

## Introduction

Acknowledgments may be included at the end of the Introduction.

## 1. First section

The text of the following environments should be in italics.
Theorem 1.1. In the theorem-like environment the text should be in italics, but numbers, colons and semicolons should be in roman letters. For instance: (a) ; (1) [1] (Definition 2.1). So you need to enclose these by the $\$$ command, like

For instance $\$: \$ \$(\mathrm{a}) \$ \$ ; \$ \$(1) \$ \$[1] \$ \$(\$ D e f i n i t i o n ~ \$ \backslash r e f\{D e f\} \$ \$) \$$.
LEMMA 1.2. In the theorem-like environment the text should be in italics, but numbers, colons and semicolons should be in roman letters.

Corollary 1.3. In the theorem-like environment the text should be in italics, but numbers, colons and semicolons should be in roman letters.

Proposition 1.4. In the theorem-like environment the text should be in italics, but numbers, colons and semicolons should be in roman letters.

CLAIM 1.5. In the theorem-like environment the text should be in italics, but numbers, colons and semicolons should be in roman letters.

## 2. Second section

The text of the following environments should be in roman.
Definition 2.1. In the definition-like environment the text should be in roman.
Remark 2.2. In the definition-like environment the text should be in roman.
Example 2.3. In the definition-like environment the text should be in roman.

[^0]Notation 2.4. In the definition-like environment the text should be in roman.
Assertion 2.5. In the definition-like environment the text should be in roman.
Remark. This remark environment is not numbered consecutively.
Proof. The end of a proof or demonstration may be marked by an open box.
