# TITLE

### FIRST AUTHOR\* AND SECOND AUTHOR

Dedicated to Professor Xxx Yyy on his sixtieth birthday

ABSTRACT. Mathematical symbols and formulas should not be used in the abstract.

### INTRODUCTION

Acknowledgments may be included at the end of the Introduction.

1. FIRST SECTION

The text of the following environments should be in italics.

THEOREM 1.1. In the theorem-like environment the text should be in italics, but numbers, colons and semicolons should be in roman letters. For instance: (a); (1) [1] (Definition 2.1). So you need to enclose these by the  $\$  command, like

For instance\$:\$ \$(a)\$ \$;\$ \$(1)\$ \$[1]\$ \$(\$Definition \$\ref{Def}\$\$)\$.

LEMMA 1.2. In the theorem-like environment the text should be in italics, but numbers, colons and semicolons should be in roman letters.

COROLLARY 1.3. In the theorem-like environment the text should be in italics, but numbers, colons and semicolons should be in roman letters.

**PROPOSITION** 1.4. In the theorem-like environment the text should be in italics, but numbers, colons and semicolons should be in roman letters.

CLAIM 1.5. In the theorem-like environment the text should be in italics, but numbers, colons and semicolons should be in roman letters.

## 2. Second section

The text of the following environments should be in roman.

DEFINITION 2.1. In the definition-like environment the text should be in roman.

REMARK 2.2. In the definition-like environment the text should be in roman.

EXAMPLE 2.3. In the definition-like environment the text should be in roman.

<sup>2020</sup> Mathematics Subject Classification. Primary 00; Secondary 00.

Key words and phrases. Toric varieties, vanishing theorems.

<sup>\*</sup>Thanks.

### F. AUTHOR AND S. AUTHOR

NOTATION 2.4. In the definition-like environment the text should be in roman.

ASSERTION 2.5. In the definition-like environment the text should be in roman.

REMARK. This remark environment is not numbered consecutively.

PROOF. The end of a proof or demonstration is marked with a square.
